

Corporate Environmental Stewardship

As a major player in the distribution of specialty chemicals to the formulation industries, SAFIC-ALCAN takes environmental stewardship to heart.

We understand that maintaining safe, sustainable operations not only impacts our company but our communities, the environment and our collective future. We also value the importance of “*Innovative*” collaboration to drive change, both internally with our businesses and functions as well as externally with the organisations, and with our customers and principals.

This Environmental Stewardship Policy aims to integrate a philosophy of sustainable development into all the organisation’s activities and to establish and promote sound environmental practice in our operations.

In this regard, Safic-Alcan commits itself to minimising its impact on our environment through:

- Providing a safe and healthful workplace
- Ensuring the responsible use of energy and water
- Conserving natural resources by reducing, reusing and recycling
- Enhancing awareness among our employees, educating and engaging them to commit to those actions
- Deploying an environmentally sustainable awareness culture
- Working with suppliers who promote sound environmental practices

Preserving the environment is everyone’s concern. We rely on each of you to understand, adhere and collaborate.

Philippe Combette
CEO of Safic-Alcan
