

Environmental Policy

Safic-Alcan Nordic AB is a distributor of chemical products for industrial customers in the Nordic and the Baltic markets.

We shall work preventively and long-term for a better environment by minimizing the environmental impact of our business, our products, and services, as far as it is economically reasonable and technically possible.

Based on the above we are committed to:

- Continual improvement through regular evaluations regarding performance on environmental and sustainability issues.
- Fulfil our compliance obligations, including applicable legal and other requirements, and contribute to meet the national environmental goals.
- Minimize our impact regarding environmental aspects from our business operations, primarily of goods transportation, business trips and products.
- Engage in dialogue with key stakeholders to improve performance related to environment and sustainability.
