OVERVIEW

A liquid eyeliner inspired by the classic calligraphy pen for drawing the finest lines and achieving perfect definition.

This waterproof liquid eyeliner pen features Dermacryl® 79, one of the strongest film formers, that makes this unique formula waterproof and smudge proof. A flexible no-fade film is formed that doesn't peel off and is only removed by using a mild cleanser.

Phase	Trade Name	Supplier	European I.N.C.I. Name	Function	%
A	Demineralized water	/	Aqua	/	62,50

PROCESS

PHASE A : Heat water up to 80°C then add TEA and stir until dissolved. Sift in Dermacryl® 79 under stirring at 80°C. Continue mixing for 20 minutes at 80°C. Remove heating and compensate for loss of water if any.

PHASE B : Add pre-mixed phase B into phase A and stir until dissolved and completely homogeneous.

PHASE C : Add into phase ABC in mentioned sequence and mix well for 10 minutes.

PROPERTIES

APPEARANCE : Black liquid.

VISCOSITY : N/A.

pH : N/A.
